## Clamping Solutions

### Worm Drive Hose Clamps - SAE Type "F"

Murray is a manufacturer of multiple grades and sizes of traditional Worm Drive hose clamps. Our SAE type F clamps have all stainless steel bands and housings. A Murray tradition for over 90 years.

#### H Series – "Gold Seal®" Clamps

Band and housing are 200/300 series stainless steel. Screw is 5/16" slotted hex head, heat treated carbon steel, plated with zinc plus trivalent chromate for long lasting protection. Good general-purpose clamp.

#### HSS Series – With "400" Series Steel Screw Clamps

Band and housing are 200/300 series stainless steel. Screw is 5/16" slotted hex head, heat treated 400 series stainless steel. The corrosion resistance of this all stainless steel band, housing and screw makes this the perfect clamp for numerous industrial installations.

#### HFSS Series - All "300" Series Stainless Steel Construction Clamps

Band, housing and screw are 300 series stainless steel. Screw is 5/16" slotted hex head. The all-300 series stainless steel construction provides better corrosion resistance than that available from the "H-SS" Series, making this worm drive clamp well suited for marine applications.

#### Rated Ultimate Torque:

Carbon Screw 50in.lbs. min. (5.6Nm)

SS Screw 60in.lbs. min. (6.8Nm)

#### Recommended Installation Torque:

Carbon Screw 30-40in.lbs. (3.4 - 4.5Nm)

SS Screw 35-45in.lbs. (4.0 - 5.1Nm)

Applies to: H, H-SS, HF-SS Series

## Clamping Solutions

### Embossed Worm Gear Hose Clamps

- Embossed worm drive clamps to the DIN 3017 standard.
- General purpose non perforated band especially suited for most hoses and soft silicone hose.
- Material and clamp size range is stamped on the band.
- Protects hose from shearing and fraying.
- Now available in the all 304 SS steel (W4) and in the popular 316SS (W5) grade steel. Ask your salesperson about the availability of the W1, W2 material grades. Available in 9mm and 12mm wide band.
- Common applications: Vehicular, industrial, mechanical engineering, plumbing & marine

## HDL High Torque Series Clamps - SAE Type "F"

Murray Corporation precision-engineered specialty clamps for various applications. OEM quantities are available directly from Murray.

All 316 series stainless steel clamp. 1/2" inch wide band is thicker than standard worm drive clamp. This construction yields superior performance and longevity in corrosive environments. Applications include plumbing, water well, municipal storm drain systems, irrigation, marine, transportation and petro-chemical.

"HDL" Series

### Rated Ultimate Torque:

316 Stainless Screw 87in.lbs. min. (9.8Nm)

### Recommended Installation Torque:

316 Stainless Screw 45-65in.lbs. (5.1 - 7.3Nm)

## Clamping Solutions

### Constant Tension Turbo Seal Clamps - SAE Type

A constant tension worm gear clamp designed to compensate for the effects of thermal cycling and/or compression set of hose. Turbo Seal provides dual spring action through convoluted spring action band and spring characteristic of the "Dual Bead Shield." Electropolishing improves weld strength, which leads to improved performance, improved corrosion resistance, and enhances appearance with a more even finish. This clamp is used in automotive, off-highway, agriculture, heavy duty, aircraft (non-flight critical applications only), and military industries and can be found on turbo chargers, tanks, air-to-air, cooling and fuel lines. The unique "Dual Bead Shield" inner liner also concentrates band-sealing pressure, increasing performance up to 30% compared to standard smooth liners. Flanged edges protect soft hose compounds.

#### Turbo-Seal Material Specifications

**Band Material:** Special proprietary grade of stainless with excellent spring properties

**Housing Material:** 300 Series Stainless

**Shield Material:** 300 Series Stainless

**Screw Material:** 300 Series Stainless

#### Rated Ultimate Torque:

75in.lbs. min. (8.5Nm)

#### Recommended Installation Torque:

50in.lbs. (5.6Nm)

## MURRAY CORPORATION Clamping Solutions

### 5/16" Wide Worm Drive Clamp - SAE Type "M" Mini Series

Lightweight, low profile, compact design allows ease of installation in restricted applications.

The 5/16 band width generates significant sealing pressure with relatively low installation torque levels. 300 series stainless steel band and housing.

## Clamping Solutions

### Double-Wire Clamps - SAE Type "A"

Double sealing action, plated to protect against rust and corrosion.

Unique Swivel Nut:

- Nut is integral part of clamp to prevent loss.
- Nut remains perfectly aligned with screw.
- Standard zinc plated material; other plating types available.
- Standard wire diameter: 12 gauge (.1055 in +/- .003in) (2.68mm +/- .08mm)

Wire Grips are non-stocking parts. Produce and release policy requires firm purchase order and specific release dates.

Packaging: Bulk.- Minimum Lot sizes apply. - Patent Numbers 2,536,612 , 4,414 ,715 , 4,592,576

#### Rated Ultimate Torque:

40in.lbs. min. (4.5Nm)

#### Recommended Installation Torque:

20-25in.lbs. (2.3 - 2.8Nm)

## Clamping Solutions

### Keystone Pinch Clamp (Welded) - SAE Type "J" (KS)

Murray KEYSTONE clamping products offer superior strength from 100% stainless steel.

#### Common Clamping Applications:

**Irrigation • Water Supply • Fuel & Vapor lines • Beverage Supply Lines**  
**Car Wash Supply Lines • Dust Shields & Air Filters • Bundles of Cable**

Keystone Pinch Clamps are welded and are quick and easy to install, and provide a uniform, tamper proof seal. They are widely used on both soft hose and rigid plastic pipe. You will find these clamps anywhere you connect poly pipe. Ear clamps are excellent for use in a multitude of irrigation and water supply systems, on fuel and vapor lines, to attach dust shields and air filters, for beverage supply lines, for car wash supply lines, and for securing bundles of cable. When crimping with a hand tool, Murray's true Keystone geometry, located in the ear area, dramatically reduces miscrimps. Keystone Pinch clamps are 100% Stainless Steel.

## Seamless Pinch Clamps (KVG T)

These "Tongue and Groove" clamps offer 360° seamless fastening. Due to their seamless design and uniform compression sealing, these clamps are often used in the beverage, automotive, marine, and motorcycle industries. They are manufactured using 304 Stainless Steel and are perfect for poly and braided tubing.

- Murray Seamless Pinch Clamps provide 360 degrees of contact with your hose to help eliminate leaks
- Made with 304 Stainless Steel for high corrosion resistance to excel in difficult conditions like marine applications
- Our patented Crimp Lobes and our improved ear geometry helps eliminate miscrimps by keeping your crimping tool in place while helping create a 360 degree seal that will increase the performance of the connection.
- Ideal for use with OEM and Aftermarket applications in many markets such as: Automotive, Marine, Heavy Duty Truck, Beverage, Medical and many others.

CLAMPS WITH OPEN DIA. (mm)	W (mm)	E (mm)	T (in)

## Clamping Solutions

### Heavy Duty Seamless PEX Pipe Clamps For use with "DZR" Brass and Plastic PEX Fittings

These patented heavy duty "Tongue and Groove" clamps offer 360° stainless fastening and meet or exceed ASTM F-2098 requirements. Due to their heavy-duty 304 stainless steel construction as well as their seamless design and uniform compression sealing, these cutting edge clamps were designed primarily for PEX (cross-linked polyethylene) PAP (PEX Aluminum PEX), PERT (Polyethylene Raised Temperature) but has numerous alternate uses.

Manufactured with patented "Non-Slip" tool crimp lobes on both ends of the ear, Murray's heavy-duty seamless PEX clamps are the best at preventing mis-crimps and slip-offs as well as holding fast under the worst conditions. Murray Corporation's clamping products are subjected to rigorous environmental testing to ensure maximum reliability and longevity in adverse conditions.

NSF Listed to ASTM F2098

PEX TUBE SIZE	W	E
3/8	7mm (0.276)	8mm
1/2	7mm (0.276)	10mm
5/8	9mm (0.354)	10 mm
3/4	9mm (0.354)	10mm
1"	10mm (0.394)	10mm

All of our PEX clamps offer our patented crimp lobe technology. This feature ensures that the crimping tool is properly positioned to help eliminate miscrimps which can result in leaks.

Part Number	PEX Tube Size	Width (W)	Open Dia.	Closed Dia.	Open Dia. Inches	Closed Dia. Inches
PEX 133	3/8"	7.0mm	13.3mm	10.8mm	0.524	0.424
PEX 175	1/2"	7.0mm	17.5mm	14.3mm	0.689	0.564
PEX 206	5/8"	9.0mm	20.6mm	17.4mm	0.811	0.686
PEX 233	3/4"	9.0mm	23.3mm	20.1mm	0.917	0.791
PEX 296	1"	10.0mm	29.6mm	26.4mm	1.165	1.039

Other sizes available upon request. Available in packed and bulk stock. Other packaging configurations available.

Use "Everlast" PEX Clamps with yellow brass fittings having a zinc content greater than 15%.

## Clamping Solutions

### T-Bolt Clamps - SAE Type "TB"

Murray T-Bolt band clamps are designed to provide connections without leaks. They are typically installed in truck exhaust or air inlet and water hoses, motorcycle exhaust systems, marine applications, irrigation system hoses, water pump hoses and filter bags. Band edges are rounded to protect the hose.

**TB series** clamps use a plated steel bolt and self-locking nut. The balance of the components are made from 300 series stainless steel.

**TBSS series** clamps are made entirely from 300 series stainless steel. Clamps are also available in 316 Stainless Steel as special order items.

Maximum service temperature for locknut is 250° (F).

High temp locknuts by special order.

#### Rated Ultimate Torque:

Plated Steel Bolt & Nut: 90in.lbs. min. (10.2Nm)  
300 Series Stainless Bolt & Nut: 75in.lbs. min. (8.5Nm)

# MURRAY CORPORATION Clamping Solutions

## Spring-Loaded T-Bolt Clamps - SAE Type "SLTB"

Murray spring-loaded clamps are designed to compensate for the expansion and contraction of hose caused by temperature and/or hose cold flow. Typical installations include silicone hoses on charge air cooling/air to air, after cooling systems, and primary engine coolant systems. Locknut rated temp. 250°F

**TBLS series** clamps use a plated steel self-locking nut, bolt and spring. The balance of the components are made from 300 series stainless steel. Band edges are rounded to protect hoses.

Maximum service temperature for locknut is 250° (F).

**Note:** Coil springs should not be compressed to solid at installation. Make sure the nut is positioned approximately one to two turns from solid. This allows the clamp to expand and contract.

**Rated Ultimate Torque:**

Plated Steel Bolt & Nut: 90in.lbs. min. (10.2Nm)

**Recommended Installation Torque:**

Plated Steel Bolt & Nut: 50-60in.lbs. (5.6 - 6.8Nm)

300 Series Stainless Bolt & Nut: 50-60in.lbs. (5.6 - 6.8Nm)

## Clamping Solutions

### Type "F" Quick Release Clamp

Band and housing are 200 Series Stainless Steel with a 200 Series Stainless screw. These quick release worm drive clamps are easy to install and remove due to the swivel action locking of the screw. This clamp has a large clamping range which makes them very versatile. It is used for closed system installations where the clamp must be opened to be fitted.

## MURRAY CORPORATION Industrial Thread Repair Kit

### TOOLS

### Repairs Damaged Threads Fast & Easy!

The Murray Tools' Split Die Thread Repair Tool reduces the need to find or buy replacement fasteners or threaded components and provides the peace of mind of knowing the repaired fastener is the original. Murray Tools' Split Die Thread Repair Tool lets you start on threads which are intact, to eliminate the possibility of cross threading.

### Easy Thread Repair

Unique patented design saves you time by avoiding the need for major disassembly or teardown of equipment to remove a damaged stud or hard to reach damaged bolt.

- Repairs damaged bolts faster than conventional thread repair tools.
- Eliminates the need for aftermarket replacement parts that are often too long, too short or the wrong hardness.
- Built for industrial use and made to withstand the conditions faced by the U.S. Military.
- Dies are designed and built to last, and have undergone thorough testing and inspections.
- Heat-treated, hardened, high-grade carbon steel meets the highest quality standards.
- Use deep well 6-point socket and or box wrenches for ideal performance.

**Ideal for mechanics, machinists, and engineers.**

**Automotive • Industrial  
Marine • Agricultural/Tractors  
Mining • Manufacturing**

100% Made in the USA  
PATENTED

Available in both  
Metric and  
American sizes.

1.

Pull apart the two halves of the Thread Repairer, taking care not to over stretch the retainer spring.

2.

Place the Die BEHIND the thread damage and release the spring tension.

3.

Turn the die COUNTER CLOCKWISE using a standard 6-point socket until repair is complete.

## Murray Tools Tri Gage

### TOOLS

## Measures Bolts & Threads Accurately to Save Time!

This time saving tool measures the bolt diameter and thread pitch for accurate replacement of bolts. Murray Tools' Bolt Sizer Thread Pitch Gage is military grade, with machine stamped markings for durability.

## Fast & Easy

Quickly identifies the correct bolt needed to get the job done right

- High-grade stainless steel, so it's rust free.
- Tension wheels are ribbed, for a non-slip grip.
- Finger notches are easy to use, for a better grip.
- Pre-drilled to put on your tool belt.
- Rounded edges to prevent injury.
- Bolt sizing blades are marked with bolt diameter and wrench size.

**Ideal for machinists, engineers, mechanics, and do-it-yourselfers.**

**Automotive • Industrial • Marine • Mining • Construction**

### Murray Tools Tri Gage

Description	Part Numbers	Specs/Contents

## MURRAY CORPORATION Nut Runner & Clamp Key

### "Flexible Clamp Driver"/Nut Runner A6000000C

Provides easy access for installation or removal in tight spaces and odd angles. Perfect for working on crowded engine compartments and plumbing repair applications. The reversible socket works with both standard 5/16" size and mini 1/4" hose clamp screws.

- 90 degree access
- Non-slip handle
- Hollow 6" flexible shaft
- Nickel plated steel

Fits both  
standard  
5/16" & 1/4"  
mini screw

### Murray Clamp Key 90003100P10

- Murray Clamp Key makes installation quick with a simple twist of the hand.
- Easy to remove/replace and is reusable.
- Produces an installation torque of 30-35 in. lbs.
- Compatible with all Murray Clamps that use a 5/16 inch screw.
